

Canon

imageRUNNER 5075

Our Favorite Feature:

Exceptional Performance and Productivity- Canon's imageCHIP system architecture provides increased power to deliver true multifunction processing- integral to meet the expanding needs of today's high volume departments and light production environments. The main unit controller features proven Canon Custom Processor technology coupled with 1GB RAM and a 40GB hard disk drive to provide exceptional performance and up to 20,000 pages of document storage capacity to allow the devices to serve as a local document storage library for high volume print-on-demand and archival applications. Plus, its dual CPU design rips through image data at fast speeds for maximum productivity. Every model also comes with a standard 120V outlet to minimize installation expenses and power consumption.
