The products you need, the support you deserve.

Headquartered in historic Charleston, South Carolina, MBM® Corporation produces world-class Destroyit® paper shredders, Aerocut digital finishing solutions, Triumph™ paper cutters and trimmers, along with other state-of-the-art finishing equipment for the graphics and printing industries.

At MBM, innovative thinking and exhaustive research and development go into every product we sell. Our products are sold through an extensive dealer network throughout the United States and backed by a staff of knowledgeable service representatives and one of the best warranty packages in the business. Our Canadian division, IDEAL.MBM, provides the same excellent sales and service support to our Canadian dealer network. Whatever your security or print finishing needs, look to MBM to meet and exceed your expectations.

VRCUT[™] Ready TRIUMPH

CUT WITH CONFIDENCE

VRCut is a groundbreaking PC software solution designed to automate the cutting workflow by promoting an efficient and error-free cutting process from start to finish. VRCut intelligently bridges the gap between pre-press and the finishing process, allowing operators of any experience level the ability to cut with confidence on select Triumph cutters.

TWO MODULES, ONE INTEGRATED WORKFLOW
The VRCut solution consists of two independent modules that work together. The Impose module creates PDF documents formatted specifically to work with the VRCUT Controller module. The Controller module connects directly to the Triumph cutter moving the back gauge and visually guiding operators through the cutting sequence.

Annual Licensing

1st year bundled with select Triumph cutters

Internet Access

Activation, licensing, and updates require internet access.

Hardware:

Operating System: Windows 7, Windows 10
Minimum Screen Resolution: 1440x900
Cutter Connectivity: USB Port 2.0 or higher
Optional: Barcode reader

HOW IT WORKS:

The operator selects the current job from a drop-down list or scans the document barcode that has been placed on the PDF by VRCut Impose. The cut sequence instructions display on the right side of the screen with the current step highlighted. Visual cues found on the top left side of the screen assist the operator in error free cutting. A graphic representation of the job is shown in the center of the screen, displaying the current paper orientation in relation to the cutter's back gauge and LED cut line.

Once the operator performs a cut, the software automatically advances to the next step and moves the cutter back gauge. The software then visually and audibly prompts the operator to discard the scrap paper, to rotate the job for the next cut, and/or to place portions on the workbench or palette.

Operators have the option to retrace the cutting steps at any time. VRCut will keep the cutter back gauge in sync with the operator cutting instructions.

VRCut Ready Triumph Cutters: 7260, 5560/5560 LT, 6660, and 5260

TRIUMPH[®]

Top-quality materials, state-of-the-art manufacturing processes and stringent quality controls guarantee durability. A Triumph cutter is designed to last for years, consistently performing as well as it did on the day you purchased it.

Today's print shops have to face an increase in digital printing, short print runs, quick job changes and extremely short-term delivery times. Our professional paper cutters with cutting lengths from 16.9" up to 28.3" perfectly meet these requirements. They provide a flexible and cost-effective solution with a unique ease of operation and perfect cutting results.

You can depend on Triumph paper cutters for safety in all office applications. Each is precisely tailored to meet your exacting requirements: The robust electro-mechanics are highly accurate, durable, and guarantee maximum operational safety with minimum maintenance. Three models feature a hydraulic clamp drive. The solidly constructed frames are designed to absorb all forces exerted when cutting while ensuring unrivaled cutting precision.

MODELS:

INTELLICUT

Cutting edge imposition and template management software integrated with the Aerocut

Design, Print and Finish Seamlessly

Intellicut is a groundbreaking approach to efficiently operate and manage your slitter/cutter/creaser document workflow.

Easily impose artwork + address data to seamlessly create PDF layouts with job barcodes and cut marks for the Aerocut. Increase your shop's productivity with Intellicut to program and manage your Aerocut template library from any networked PC. Take control of your entire print and finishing workflow process with the Intellicut software!

from **ART** to **FINISH**

LYTROD
SOFTWARE

Template Based Barcode System

Over 170 preset templates are available with your Aerocut, and Intellicut generates perfectly imposed PDFs with template barcodes. Have a custom job? Create a template once that automatically saves in both your Intellicut library and in the Aerocut Manuset library with your unique barcode. All you need to do is select the template, add artwork, print and cut!

Aerocut Smart

The Intellicut imposition tool uses Lytrod's proprietary Smart Layout Assistant technology. Select paper size, cut size, bleed edge and let the Smart Layout Assistant do the work for you, determining the perfect layout that will meet all Aerocut requirements. Download the template with one mouse click to your Aerocut. Save time and money by ensuring any layout you create will work seamlessly on the Aerocut.

Multipage Artwork Support

Intellicut supports whatever Variable Data tool you have today by imposing multi-page PDF files with ease (or you can use Intellicut's built in data merge features!). Intellicut ensures that pages are stacked in the correct order on your Aerocut.

Smart Layout Assistant:

Aerocut Digital Finishing Systems

MBM® has assembled a collection of finishing solutions ideally suited for the digital realm. From cutting, to creasing, to perforating, these all-in-one finishing systems will take your digital production to the highest level. Business cards, post cards, invitations, greeting cards, leaflets, tickets, and more are all easily finished at the tip of your fingers. Get the most from your in-house creativity with MBM's Aerocut Line.

AEROCUT

DIGITAL FINISHING SYSTEMS

AEROCUT PRIME

- **SLITTER**
- **SKIP PERFORATOR**
- **CREASER**
- **PERFORATOR**
- **CUTTER**

INCLUDED WITH PRIME:

Jump perf unit • Cross perf unit • Conveyor stacker • Barcode reader • LAN connector • Intellicut Lytrod software • Scoring wheels and extended exit tray optional

OTHER DIGITAL FINISHING MODELS:

Aerocut Velocity

Speed: 20 sheets/min
Sheet capacity: 4"
Power supply: 120 V, 60 Hz

Aerocut NanoPlus

Speed: 20 sheets/min
Sheet capacity: 1.2"
Power supply: 120 V, 60 Hz

SAFETY PROTECTION SYSTEM (SPS)

SPS IS A COMBINATION OF INNOVATIVE DESIGN FEATURES FOUND ON EVERY DESTROYIT PAPER SHREDDER WHICH INSURE THE HIGHEST STANDARDS OF SAFETY.

These SPS features include a patented, electronically controlled transparent safety shield in the feed opening, an electronic switch that stops power to the motor when the cabinet is opened or the shred bin is full, automatic reverse and power cut-off when overfed, and double protection against overheating. The environmentally friendly zero energy consumption feature is a power saving sleep mode that activates after 30 minutes of inactivity.

EASY DOES IT

The large, intelligent Easy Switch control element indicates the operational status of the shredder with illuminated color icons and back-lit symbols. It also provides an added degree of safety by functioning as an emergency stop switch.

DESTROYIT®

DESTROYIT® PAPER SHREDDERS ARE DESIGNED FOR COMPANIES THAT WON'T SETTLE FOR ANYTHING LESS THAN THE WORLD'S BEST SHREDDER.

Destroyit® paper shredders have set the industry standards for over half a century. Models meet or exceed all 7 of the security levels defined under the DIN 66399 international standard. Cutting shafts are constructed entirely of hardened steel and are covered by a lifetime warranty (high capacity and super micro-cut shafts are covered for one year). In addition to their innovative, functional design, the exclusive SPS™ safety features put them among the safest paper shredders in the world.

A High Capacity in-house shredding program designed around Destroyit is the most secure and economical way of efficiently disposing large amounts of sensitive documents.

Centralized Office models are commercial grade, high volume machines specifically designed to shred large amounts of material daily. Ideally, they are placed in a common area and shared by employees.

Deskside shredders put effective data security right at your side. Unlike cheaper brands, they are built with the highest quality materials and construction standards to provide years of dependable service.

MBM has Special Solutions for protection against the abuse of electronically stored data. A single hard drive from a PC, laptop, or MFP can store astounding amounts of information and could have catastrophic consequences for your organization should it fall into the wrong hands.

MODELS:

FOLDERS

MBM's paper folder line features machines for corporate applications as well as high-volume postpress operations.

MBM folders offer the optimum combination of speed, precision, and ease of use, making them perfectly suited for small offices, schools, and corporate environments. For professional printing applications, where efficiency is at a premium, MBM automatic programmable models store multiple fold programs in memory and can be set up to run at the touch of a button. Advanced features such as automatic feed tables, self-setting exit rollers, and micro-adjustment dials ensure an excellent finish to every job.

FOLD TYPES

- HALF  98M
 - LETTER  1800S, 352F, 352S
 - Z-FOLD  208J, 408A, 508A
 - DOUBLE PARALLEL 
 - FOLD OUT 
 - GATE 
 - *CROSS 
- *Requires 2-pass

MODELS:

GoCrease™ CREASERS

Perfect for digital applications, MBM GoCrease creasers allow documents printed on heavy or coated stock to be creased prior to folding, creating a crisp, more accurate fold with no cracking.

MODELS:

BOOKLETMAKERS

Speed and versatility are the hallmarks of MBM bookletmakers. Our Sprint models enjoy a solid reputation in the print finishing industry for performance and dependability. The revolutionary SF2 bookletmaker utilizes wire-fed stitching technology previously found only in larger systems costing up to three times more. An optional face trimmer can be combined with the SF2 for the ultimate booklet finishing system. The iBooklet is a tabletop bookletmaker featuring a compact design, easy operation, and fast production. MBM's Stitchmaster wire stitcher features foot pedal operation and one-step threading.

MODELS:

TRIUMPH TRIMMERS

Triumph trimmers are built to the same exact tolerances as Triumph cutters. All trimmers feature sturdy, all-metal construction and the finest Solingen steel blades. Every Triumph trimmer features stationary or movable transparent Lexan safety guards.

MODELS:

COLLATORS

The FC 10 automatic collator is one of the most versatile collators on the market today. Reliable and easy to use, it interfaces with a variety of bookletmakers including the MBM Sprints™ and SF2 series. The twin tower transport unit allows two FC 10's to work in tandem as a 20-bin collating system (SF2 only). A heavy-duty base mounted on casters allows easy mobility.

FC10 Twin Tower

FC10

SUPPORT PRODUCTS

MBM's line of print finishing support products includes paper joggers, pressure sealers, drills, and everything needed for the ultimate finishing system.
